

INSTANDA™

FAQ

Leading edge SaaS insurance software that allows you to build, configure and launch products within unprecedented timescales, and amend them instantly at will.

Users configure and release insurance product questions, rating, documents and screen templates

Amend or clone products as needed to change brand, cover, commission or channel rates

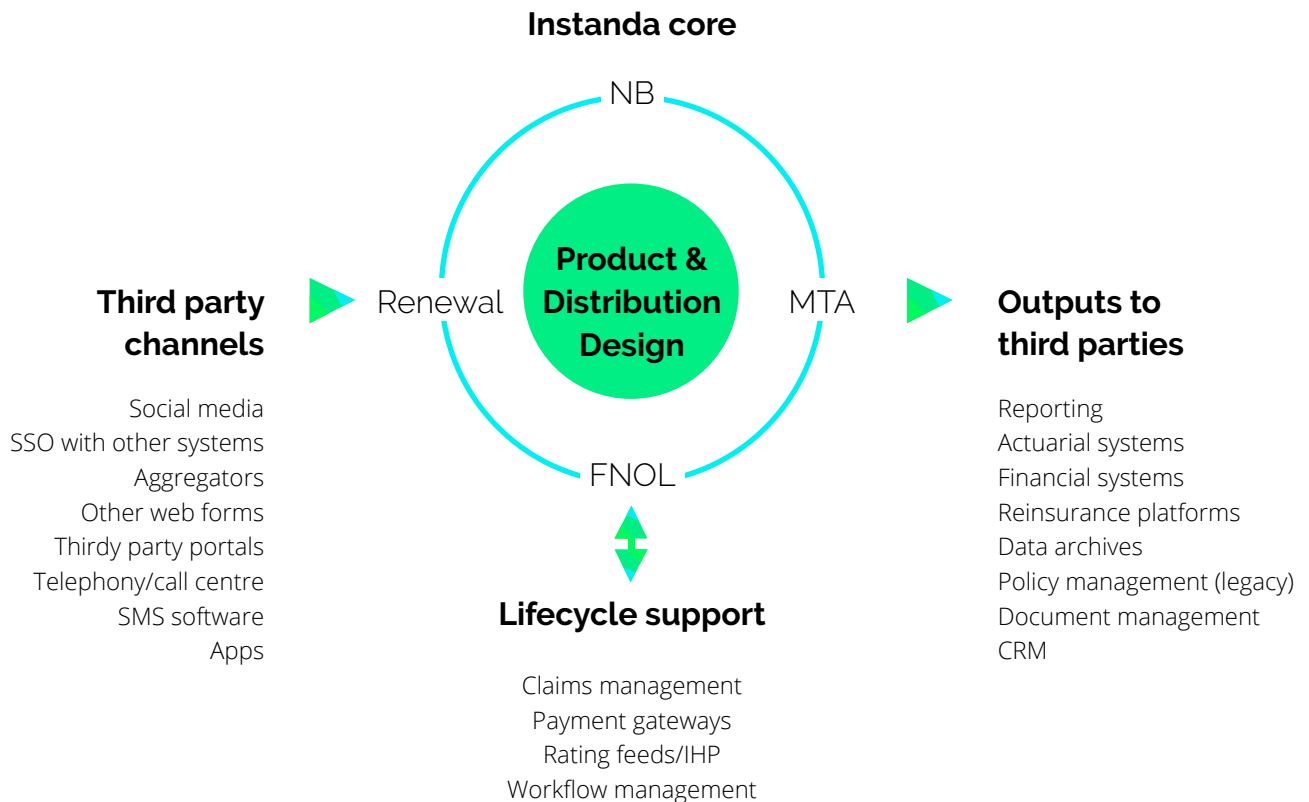

Test and launch new services in a safe, secure and scalable environment for product launch or R&D ('fail fast')

Cloud based in Azure (EU)

DR as standard

Mobile compatibility as standard

Ongoing management at low cost

Costs: **first product build + training**, then **% GWP**
